Here you can see how simple it is to mount / automatize your gate with Easyjack/SuperJack

Step 1: to automatize gate

Step 2: pile to mount the actuators

Step 3: to mount the “BMH” set

Step 4: actuator mounting

Step 5: actuator mounted

Step 6: controlbox mounted

Step 7: controlbox waterproof closed

Step 8: wings automatized, ready for use
Automatic openers for gates/fences, doors, incl. remote control
complete kit for self installation

For Wing gates

EasyJack:
2 actuators (same motors as SuperJack) controlbox
mounting brackets, infra red safety system
remote control

SuperJack (actuator system):
2 actuators, controlbox, mounting brackets
remote control, infra red safety system, electric magnetic lock
stopper, extra antenna, pushbutton,
keyswitch, battery (in case of power failure)

SuperJack (articulated system):
2 motors, controlbox, mounting brackets
infra red safety system, remote control

For Wing gates (underground system)

SuperJack UG HP:
2 motors, controlbox, 2 remote control, mounting brackets
electro magnetic lock, stopper, infra red safety system

For Sliding gates

SuperJack type sliding:
1 motor, 8 racks 50 cm (more is possible)
infra red safety system, mounting brackets
battery (in case of power in failure), keyswitch, remote control

for automatisation small (inside-outside) doors and fences

SuperJack Door automatizing:
1 actuator, controlbox, mounting brackets,
battery (in case of power in failure) pushbutton, remote control,
infra red safety system

If 2 actuators needed, possible.

All prices in this wholesale brochure are excl. VAT
Examples showing the different types of the gateopeners

EasyJack and SuperJack type actuator

SuperJack articulated system

SuperJack type UG HP underground system

SuperJack sliding gate

SuperJack: door automatizing
complete kit consisting of:
- 2 actuators (motors) to be fixed to wing leave
- control box (incl. radio control system)
- mounting brackets
- 1 set of 2 infra red safety sensors (obliged by law)
- 1 remote control
- installation manual

SuperJack – for swing gates

complete kit consists of:
- 2 actuators (motors) for fixing on swing gates
- control box (incl. battery back and radio control)
- mounting brackets
- 1 set of 2 infrared photocells (legally obliged)
- 1 remote control
- 1 push button (for opening from the house)
- 1 key switch (to open your gate with a key)
- 1 latch (for securing your gate at the bottom)
- 1 bumper (to fix the stop position)
- 1 antenna (for longer range)
- installation manual
Swing gates pictures
EasyJack/SuperJack type Actuator – mounted
SuperJack articulated system- for swing gates

complete kit consists of:
- 2 motors and mounting brackets for mounting on the gate wings
- controlbox (incl. radio control system)
- 1 remote control (more is possible)
- cables for battery connection
- possibility for connecting pushbutton, warning light, key switch, GSM using,
- manual for SuperJack with a lot of possibilities, a.o. automatic closing etc.
- SuperJack elbow type: lock is not needed, the 2 motors act like a lock
- SuperJack elbow type is noiseless.
Swing gates opener
examples with SuperJack articulated type
Underground opener type SuperJack UG HP

complete kit consists of:
- 2 underground motors
- rails and connectors
- control box
- electro magnetic lock & stopper
- 2 remote controls
- infra red safety sets
Swing gate opener examples with SuperJack UG HP underground type
SuperJack door automatizing for (inside/outside) turning doors/gates

complete kit consists of:

- 1 motor for mounting on the door/gate
- controlbox (incl. radio system) and separate connection for i.e. garden lightening
- safety sensors infra red
- remote control
- pushbutton voor mounting inside
- battey (system continues in case of power failure)
- mounting brackets for screwing

also 2 motors can be connected on the logic board.(if 2 gates leaves)
Door automatizing examples for type SuperJack Doordranger for inside/ outside doors/gates
SuperJack for sliding gates

complete kit consists of:
- 1 motor for mounting on the gate with automatic stop
- 8 rails x 50 cm
- incl. accu / battery in case of power failure
- mounting brackets, screws and nuts
- safety photocells
- keyswitch
- 1 remote control for in the car - more can be bought
- extensive instruction manual with numerous features and setting (a.o. automatic close function)

- extensive instruction manual with numerous features and setting (a.o. automatic close function).
- SuperJack Automatic gate openers are designed for self installation

For Wing Garagedoors

**EasyJack:**
2 actuators (same motors as SuperJack) controlbox
mounting brackets, infra red safety system
remote control

**SuperJack (actuator system):**
2 actuators, controlbox, mounting brackets
remote control, infra red safety system, eletric magnetical lock
stopper, extra antenna, pushbutton,
keyswitch, battery (in cas of power failure)

**SuperJack (articulated system):**
2 motors, controlbox, mounting brackets
infra red safety system, remote control

---

For Garagedoors
1 piece door and sectional doors the Chamberlain / Liftmaster

**type LM 50 EV** (chain)
24 V DC power with noiseless Soft Start / Soft Stop function
3 piece steel rail (35 mm) incl. chain for max. doorheight 2,3 meter
2 channel mini remote control with rolling code
led light

**type LM 60 EV 23** (belt)
24 V DC power with noiseless Soft Start / Soft Stop function
3 piece steel rail for doorheight 2,3 m
2 channel mini remote control with rolling code
1 pushbutton (wired)
1 led light (2,5 minute)

**type LM 100 EV 23** (belt) for heavy doors
24 V DC power with noiseless Soft Start / Soft Stop function
3 piece steel rail for doorheight 2,3 m
2 channel mini remote control with rolling code
1 pushbutton (wired)
1 led light (2,5 minute)
5 year warranty on the motor chassis

---

all prices are excl. VAT
Examples to show the different types of garage door openers

EasyJack and SuperJack, type actuator

SuperJack articulated type

Liftmaster type LM 50 (chain)

Liftmaster LM 60 / LM 100 EV 23 (belt)
EasyJack – for swing gates

complete kit consists of:
- 2 actuators (motors) to be fixed to wing leave
- control box (incl. radio control system)
- mounting brackets
- 1 set of 2 infra red safety sensors
  (obliged by law)
- 1 remote control
- installation manual

SuperJack – for swing gates

complete kit consists of:
- 2 actuators (motors) for fixing on swing gates
- controlbox (incl. battery back and radio control)
- mounting brackets
- 1 set of 2 infrared photocells (legally obliged)
- 1 remote control
- 1 push button (for opening from the house)
- 1 key switch (to open your gate with a key)
- 1 latch (for securing your gate at the bottom)
- 1 bumper (to fix your in position)
- 1 antenna (for longer range)
- installation manual

SuperJack articulated system- for swing gates

complete kit consits of:
- 2 motors and mounting brackets for mounting on the gate wings
- controlbox (incl. radio control system)
- 1 remote control (more is possible)
- cables for battery connection
- possibility for connecting pushbutton, warning light, key switch, GSM using,
- manual for SuperJack with a lot of possibilities, a.o. automatic closing etc.
- SuperJack elbow type: lock is not needed, the 2 motors act like a lock
- SuperJack elbow type is noiseless.
